iView Systems Awarded Top 30 Technology Innovations Honour

Solid Year of Growth Ends on High Note

OAKVILLE, ONTARIO--(Marketwire - Jan. 27, 2010) - iView Systems is proud to be rated as one of the top 30 Technology Innovations of 2009, chosen by Technical Writers Bob Dolph ("Tech Talk") and Steve Payne ("Convergence Channel"), of Security Sales and Integration Magazine (SSI).

iView Systems had an extraordinary year of growth in 2009, launching a new website, building on its' partnerships with Lumenera, Proximex and Cisco to name a few. Additionally, iView attained GSA (General Service Administration) access for the US Federal Government via Four Points Technology. This partnership was formed out of a successful bid with the National Gallery of Art in Washington, DC.

iView Systems also enhanced its' customer service with a new support web site. This new dedicated portal allows customers access to submit, view and manage support issues, as well as software updates, review product knowledgebase articles and much more.

Our partners Pelco and Genetec were also on the list of SSI's Top 30 Technology Innovations;

iView's iLPR - Intelligent License Plate Recognition Software integrates Genetec's AutoVu Sharp IP based license plate recognition cameras, delivering advanced digital video processing and plate matching against registered license plates, vehicles and subjects within the iTrak reporting platform.

The iDVR Acquire - Intelligent Digital Video Recorder module plugs directly into the iTrak media interface allowing media capture via 3rd party Digital/Network Video Management Systems such as Pelco's Endura platform for reporting purposes.

iView's core platform, the iTrak Incident Reporting & Risk Management system has been designed to provide a centralized, modular platform for interdepartmental investigations. With a highly secure, multi property, multi departmental solution, the system handles all transactions relating to Security, Surveillance and Risk Management.

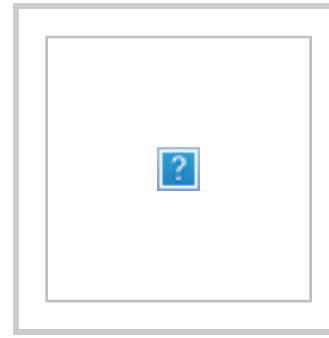

About iView

iView Systems addresses the needs of multiple industries for a single desktop incident management and reporting system, providing both an incident and subject centric solution. iView's core product (iTrak) was developed with extensive consultation with the security and surveillance marketplace. iView Systems has rapidly attained industry recognition for its unique solutions and now provides incident reporting, dispatch and visitor management platforms and services to the global security marketplace, including the gaming, banking, corporate security and other loss prevention environments. iView Systems is dedicated to maintaining a consultative process with its clients to ensure that all deployments are optimised to meet their specific requirements, through design, configuration, deployment and post deployment project processes. iView Systems is located in
