

iView Systems Announces Foxwoods Resort Casino Enhances iTrak Incident Reporting Platform Installation With iDVR Acquire(TM)

OAKVILLE, ONTARIO -- (MARKET WIRE) -- 10/23/07 -- Foxwoods Resort Casino, the largest Casino destination in the world has deployed the first release of iView's iDVR Acquire module into the existing iTrak(TM) Incident Reporting Platform. iDVR Acquire integrates into American Dynamics Intellex Digital Video Management System for media (pictures, video) acquisition.

Intellex is a digital video management system that combines multiplexing, simultaneous display of live video, play back video, audio and text, while hosting multiple remote users, archiving and Smart Searching, all while recording from up to 16 cameras.

The iTrak Incident Reporting & Risk Management System provides security and surveillance departments with a complete integrated risk management tool. It replaces traditional inefficient and unreliable paper based systems, enabling more effective deployment of available resources.

The iDVR Acquire module plugs directly into the iTrak media interface allowing media capture via the Intellex Digital Video Management System for daily logs, incident reports, subjects and more.

"I am extremely pleased with the ease of integration with iView's iDVR Acquire module and our American Dynamics Intellex Digital Video Management System. This initial integration paves the way for our future visions of a single platform for all our current and future software programs and operating systems." said Timothy Bohr, Director of Surveillance, Mashantucket Pequot Tribal Nation, Foxwoods Resort Casino.

"We're pleased that the Intellex digital management system can provide the essential backbone to support such powerful integration." said Jim Kelly, Vice President of Americas Sales.

"As the size and complexity of the security and surveillance role increases, personnel require integrated solutions to better protect people, property and assets. The iDVR Acquire module for the iTrak platform provides key time saving single platform media capture to the American Dynamics Intellex security and surveillance marketplace." said Martin Drew, President of iView Systems.

About iDVR Acquire

Offering complete flexibility and ease of use, the iDVR Acquire module is an ideal digital solution for Intellex based gaming, banking, retail and loss prevention environments. By integrating directly via the Intellex Software Development Kit (SDK), the iDVR Acquire module provides intuitive software for complete digital media management from the iTrak Incident Reporting & Risk Management Platform. It allows individuals to quickly and effectively search and isolate video events from Intellex Digital Video installations from any number of cameras and clip images directly into the iTrak media interface.

About Foxwoods

Foxwoods comprises six casinos that collectively offer more than 7,400 slot machines and an incredible 388 tables for 17 different types of table games, including 76 for poker. There's a luxurious, high-tech Race Book as well as the world's largest Bingo Hall.
